- Web Development
- Open Access Alternatives
- Impact Factor Assessment

Libraries and their institutions can no longer keep up with the increasing cost of scholarly resources. Involvement by the academic community is critical in ensuring that efforts to reclaim scholarly communication for scholars and researchers succeed.

# KNOWLEDGE

## DISSEMINATION

The scholarly products of higher education are often invisible to the general public, other scholars, and funding sources like the state legislature. Institutional Repositories are an archive and dissemination tool for delivering scholarly materials to students, academicians, and citizens via the Internet.

# MANAGEMENT

## PRESERVATION

The University of Utah libraries are committed to preserving your scholarship for future generations of students and researchers.

## ACCESS

This repository will benefit faculty by being a one-stop archive that be available in perpetuity. The University will benefit from the increased visibility of its research and artistic endeavors.

## Types of materials that can be submitted to the Repository

- e-prints
- Journal articles
- Book chapters
- Monographs
- Theses and Dissertations
- Data sets
- Multimedia suscipit lobortis.
